Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	1-5	YES
		Claims		N0
	Inventive step (IS)	Claims	1-5	YES
		Claims		N0
	Industrial applicability (IA)	Claims	1-5	YES
		Claims		

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: KR 88-15621 U D2: US 5,319,808 A

Claim 1 of the present invention relates to an inner liner of a safety helmet having an impact absorbing member around its outer periphery. Its dependent claims 2-4 disclose that inner liner is attached to the safety helmet with bolts, or disclose the materials of said member. Claim 5 relates to a method of manufacturing said liner.

D1 relates to a safety helmet having an impact absorbing liner made of foam resin between a suspension webbing arrangement radially connected with a band around a peripheral edge of the helmet and an outer frame of the helmet. The band and the impact absorbing liner of D1 are similar to a liner and an impact absorbing member of the present invention, but D1 is different from the present invention in the shape of liner having radially connected suspension webbing arrangement, and the position of the impact absorbing liner.

D2 relates to an impact absorbing protective cap having an impact absorbing member comprising a suspension webbing arrangement, an attenuator band and a liner. D2 is different from the present invention in the position of said liner and the method of connecting said liner with said attenuator band.

Thus the subject matter of claim 1 and claims 2-5 dependent on claim 1 is novel and inventive under PCT Article 33(2)-(3).

There is no reason for denying industrial applicability of the present invention.
